

RESUMO DO COMPONENTE CURRICULAR**Dados Gerais do Componente Curricular**

Tipo do Componente Curricular:	DISCIPLINA
Unidade Responsável:	PROGRAMA DE PÓS-GRADUAÇÃO EM ENGENHARIA CIVIL (10.01.06.04.04.06)
Código:	ECI0007
Nome:	IMPACTOS AMBIENTAIS DA INDÚSTRIA DA CONSTRUÇÃO CIVIL
Carga Horária Teórica:	60 h.
Carga Horária Prática:	0 h.
Carga Horária Total:	60 h.
Excluir da Avaliação Institucional:	Não
Matriculável On-Line:	Sim
Horário Flexível da Turma:	Não
Horário Flexível do Docente:	Sim
Obrigatoriedade de Conceito:	Sim
Pode Criar Turma Sem Solicitação:	Não
Necessita de Orientador:	Não
Exige Horário:	Sim
Permite CH Compartilhada:	Não
Quantidade de Avaliações:	1
Ementa/Descrição:	Problemática ambiental, desafios e oportunidades num contexto da construção sustentável. Aspectos e impactos ambientais da indústria da construção: consumo de recursos e produção de poluentes e resíduos. Matriz de risco ambiental. Estratégias e soluções ambientais proativas: oportunidades de integração e inovação na escolha dos materiais de construção e exploração de infraestrutura. Sistemas de Informação Geográfica como ferramenta de análise espacial e de gestão dos impactos ambientais.
